**Model Course Content:**

Prior to each meeting, an article from one of the publications you have selected at your registration will arrive to you by email.

Students are expected to arrive at the lesson having already read the article and noted any questions with regard to vocabulary or structure they found challenging or incomprehensible.

These questions will be answered and then a focused conversation or debate will be carried out regarding the article's content and position.

Students will be expected to keep track of new vocabulary and expressions gained during the meetings in a lesson log to plot progress.
